Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/762,945	Applicant(s) ELLIS ET AL.	
	Examiner Ms. Arti Singh	Art Unit 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 17, 2007 has been entered. All previously made rejections are now withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6734157 issued to Radwanski et al. in view of US 6,605,666.

4. Radwanski et al disclose making wipers that provide a controlled release antimicrobial agent. Said wipe may be a hard surface wipe (column I-Field of Invention). The antimicrobial agent may be applied while the fibers are being made (column 3) or may be incorporated with the substrate or may be applied as a coating and adhered to the substrate layer (column 2). The antimicrobial agents that are employed can be combined with various polymers, binders or a combination thereof (column 3). The substrate may be a fibrous nonwoven that is hydro-entangled, which can be a composite absorbent fabric (abstract), thus meeting the limitations of being a laminate -claim 5. In column 3, the instant patent teaches that the antimicrobial agent can be a plethora of agents and includes that of quaternary type (see also columns 7-

Art Unit: 1794

8). In column 5 towards the beginning the instant patent teaches that the antimicrobial agent that is applied to the substrate is activated or release upon contact with water.

Radwanski does not teach the use of the claimed antimicrobial with an anionic binder. However, '666 teach the combination of the claimed antimicrobial agent and an anionic polyurethane binder. Said composition may be used as a coating composition for use as an antimicrobial. Thus, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to have employed the composition of '666 in the composite of Radwanski. One would have been motivated to do create an antimicrobial wipe.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ms. Arti Singh whose telephone number is 571-272-1483. The examiner can normally be reached on M-T 9-5:30pm.
